Your Pathway to a Global Health Care Career

This bundle is specifically designed for:

- ⦿ **Fresh Graduates** in Social Work, Medical Support Services, Occupational Therapy, and related fields in India and GCC.
- ⦿ **Candidates Interested to work in the Health Care Industry** in the UAE and India.
- ⦿ **Aspiring Care Professionals** planning to work in countries like the **UK, USA, Canada, Australia, and New Zealand, Germany and other European Countries** or within the **GCC**.
- ⦿ **Students Going Abroad** for studies who are planning to work part time in the care sector

An ATHE qualification can provide international recognition and transferable credits, helping you progress to further study or secure job placements internationally.

THE 5-COURSE SPECIALIST BUNDLE

Each course is a one-day training session, utilizing interactive formats like seminars, workshops, case study analysis, and role-play to ensure practical, non-aversive learning.

Course Title	Core Focus & Skills Acquired	Relevance to Global Care
1. Understanding and Working with Autism & ASD	Gain a detailed analysis of Autism and communication challenges. Learn to utilize non-aversive techniques, apply Social Stories, understand communication aids, and be fully conversant with the SPELL approach	High Demand Skill: Working with Autism Spectrum Disorder (ASD) is a critical area in global education and social care provision. The training promotes confidence in supporting children and young people with autism.
2. Working with Attachment and Trauma Issues	Understand attachment and trauma processes from a therapeutic perspective. Learn to provide integrated therapeutic support and manage difficulties effectively. Learn the role of Motivational Interviewing and how to work with projected feelings.	Essential Therapeutic Skill: This is crucial for residential and community care settings, providing the therapeutic style of service delivery that promotes better outcomes.
3. Therapeutic Play and Engagement Training	Understand and implement the concept and practical application of therapeutic play and engagement techniques. Gain a good understanding of Theraplay and deliver engagement using Motivational Interviewing principles.	Practical Care Skill: Play and engagement are essential tools for supporting development and communication, particularly with children and young people with complex needs.
4. Psychologically Informed Environments (PIE)	Train in PIE practice within residential provision. Understand how differing trauma impacts young people from a psychologically informed way. Develop confidence and deliver PIE practice in direct support.	Advanced Practice: PIE is a cornerstone of modern, therapeutic care, particularly in residential settings, and is a strong indicator of best practice methodology.
5. Safeguarding and Cultural Awareness	Equip yourself with the knowledge to effectively safeguard children with disabilities from a cultural perspective. Learn to identify unique presentations of abuse/neglect, apply inclusive communication strategies, and develop individualized safeguarding plans.	Legal and Ethical Requirement: This addresses the critical need for cultural sensitivity and compliance with legal frameworks and policies, which is essential for working with diverse populations globally, including the UAE and India.

Resicare Alliance

KEY CAREER BENEFITS

- © **International Standards:** All courses emphasize **best practice methodology**, preparing you for the high standards of care required in the UK, USA, Canada, Australia, New Zealand, Germany and other European Countries and the GCC.
- © **Continuing Professional Development (CPD) Value:** This structured training is a significant investment in your professional growth, providing verifiable learning hours that count towards your CPD portfolio. **Maintaining a strong CPD record is often required to maintain professional registration and licensing** in healthcare and social care globally (e.g., for Occupational Therapists or general care workers).
- © **Core Competencies:** Develop a robust understanding of **direct support, therapeutic processes, and psychologically informed practice.**
- © **Confidence Building:** The training is designed to help participants generally feel **more confident** in supporting children and young people with autism, attachment, and trauma issues.
- © **Immediate Work Eligibility for Study Abroad:** The **ATHE Accredited Specialist Diplomas** provide a recognized and accredited foundation of skills that can significantly enhance your applications for **part-time work in the health care sector** while studying abroad (e.g., as a support worker, care assistant, or youth worker). Demonstrating these accredited, specialized skills improves your marketability and shows commitment to quality care, which is highly valued by international employers.
